Drop In Chalets

Its definitely not an understatement to say its been a very busy year at Drop In Chalets! Aside from doubling our catered chalet count from two to four, we've also pushed ever harder to improve our standards and services. Our new flagship chalet, the 200 year old Mont Blanc Lodge, has been beautifully refurbished both inside and out. Tucked away aside the beautiful Parc Couttet and a stones throw from Chamonix's fantastic new Jazz and music venue 'Maison des Artists' it offers fantastic 6 bedroom accommodation with a perfect central location.

Moreover brand new for winter 2017 we're really focusing on technology to add to our guests experience and are introducing in-chalet media tablets giving our guests instant access to the best local maps, apps and information to help us bring Chamonix to life and guide our guests through this huge resort and ski area. Also we've added free Spotify and new in-chalet sound systems for those that cant be without their favourite music choices when they are away.

In addition to our ever evolving menu this year we've focused on mixing balanced modern eating with the traditional French mountain foods and the French cheeses that everyone loves so much. We've also redoubled our search for the best wines and champagnes available and will be serving Prosecco cocktails as pre-dinner aperitifs with our canapes this winter!

As perfectionists we're constantly working on new services and dreaming up new weird and wonderful ideas to create the very best ski holiday and bring the Chamonix experience closer to our guests. In short if something matters to you we'll try our very best to make it happen.
